<i>Specific Progress Task:</i>	

Section A: Short Questions

- Answer any 10.
- Each question is worth 6 marks

Q1.

Identify **one** moist method of cooking suitable for fish.

--

Describe the underlying principle of the cooking method named.

Q2.

In relation to eggs, explain each of the following: (6)

Organic _____

Lecithin _____

Q3.

Describe **one** physical and **one** chemical change that occur during the cooking of food. (6)

Physical change _____

Chemical change _____

Q4.

In relation to protein, explain deamination.

Q5.

Complete the table below in relation to alternative (novel) protein foods.

	Source	Product
Plant		
Micro-organisms		

Q6.

State **two** properties of protein.

(i)
(ii)

What is mycoprotein?

Q7.

State **two** causes of protein denaturation and give **one** example in each case.

Cause	Example

Q8.

Name **one** food source of **each** of the proteins listed below.

(6)

Proteins	Food source
Casein	
Actin	
Albumin	

Q9.

5. State **two** advantages of including tofu in the diet. (6)

(i) _____

(ii) _____

Other than tofu, name **two** protein alternatives that can be used in a vegan diet.

(i) _____ (ii) _____

Q10.

Complete the following in relation to the digestion of proteins. (6)

Organ / Gland	Secretion	Enzyme	Substrate	Product
Pancreas	Pancreatic Juice			

Q11.

Outline how consumers have become more nutritionally aware and health conscious in their food choices.

(i)
(ii)

Q12.

Indicate with a tick (✓) whether **each** of the following statements is true or false.

	True	False
Meat contains fibres and connective tissue		
1 g of protein provides 4 kilocalories of energy to the body		
Eggs are a low biological value food		

Section B: Long Questions

- You must answer Q1. (80 marks)
- Answer 1 other long questions (50 marks each)

Question 1- Must Complete

Shown below in the table is the cost (€) and percentage (%) of the weekly social welfare allowance required to purchase the foods necessary for healthy eating for four households using three different grocery store outlets.

	Multiple supermarket	Low cost shop	Local shop
Household 1 Adult man and woman, boy aged 5 years and boy aged 14 years <i>(Total household requires 8200 calories per day)</i>	€132.40 29%	€114.80 25%	€255.40 56%
Household 2 Adult man and woman without children <i>(Total household requires 4400 calories per day)</i>	€82.20 25%	€65.80 20%	€154.70 47%
Household 3 Woman aged 65+ years <i>(Total household requires 1800 calories per day)</i>	€32.40 14%	€27.00 12%	€54.00 23%
Household 4 Single adult woman with a boy aged 5 years <i>(Total household requires 3400 calories per day)</i>	€54.80 21%	€45.40 17%	€109.00 42%

- (a) Evaluate shopping in the **three** grocery outlets referred to in the chart above. (12)
- (b) Apart from family size, give **three** reasons for the variation in the percentage of income spent on food each week. (12)
- (c) Protein rich foods are a significant cost for many families. Recommend a variety of low-cost protein foods **and** state how each can be incorporated into a healthy eating plan. (9)
- (d) Give a detailed account of protein and refer to:
 - classification (simple and conjugated) (24)
 - supplementary value / complementary role (8)
 - structure (primary, secondary and tertiary). (15)

Q2.

‘A thorough understanding of the factors which influence meat eating quality is imperative in order to produce a product consistently in line with consumer expectations.’ *(Teagasc)*

(a) Discuss the nutritional significance of meat in the diet. **(20)**

(b) Describe **each** of the following:

- the factors that cause toughness in meat
- **two** methods of tenderising meat. **(15)**

(c) Set out details of **one** process used to extend the shelf life of meat.
In your answer refer to:

- name of process
- how the process is carried out to include the underlying principle involved
- the effect of the process on meat. **(15)**

Q3.

‘Few Irish people consume the two portions of fish recommended each week. Despite being surrounded by some of the best fishing and fish in the world we are often reluctant to try this incredibly healthy food.’

Press Release – Evening Herald

(a) Evaluate the nutritional and dietetic contribution that fish makes to the diet. **(20)**

(b) Recommend **one** dry method of cooking and **one** moist method of cooking suitable for fish.

In relation to each method recommended:

- state the underlying cooking principle involved
- comment on the palatability of the cooked fish. **(20)**

(c) Identify and discuss **two** contemporary trends in Irish eating patterns. **(10)**
